Agenda 8: Other topics (if any)

No shareholders proposed additional agenda to the Meeting.

After the meeting agendas were completely proceeded, before closing the Meeting, the Chairman gave an opportunity to the Shareholders to express opinions and make inquiries about further questions. Then the Board of Directors and the Executives jointly responded to the inquiries from the shareholders with the following summary;

1. Inquiry about the trend of operating results in terms of sales and profit margins in the future:

It was responded that the Company’s business operations and the world economy is under a geopolitical pressure, which causes an effect on an energy crisis consumption and exports. At this time, the geopolitical situation is still uncertain. Various major economists in Thailand also are aware of the geopolitical risk. Therefore, the Company's trend as inform afterwards is subjected to change following the impact of geopolitics.

The Company's market relies on the automotive market both 4-wheel cars and 2-wheel motorcycles assembled in Thailand. Currently, car production trends of various brands are trying to maintain their production capacity not less than last year, although at the beginning of the year there was a lot of news about the automotive industry being affected by household debt issues. The household debt situation has been at a very high proportion since October 2023, which was linked to leasing debt and vehicle repossession. The confiscated cars will turn out to be second-hand cars, which are in greater numbers than usual. As a result, the production of new cars are slowed down as well. This will result in the January-March 2024 period when the company closes the current quarterly accounting period. It is assumed that these things are caused by the deterioration of the

purchasing power due to 1. Economic conditions, and 2. The delay of issuing the 2024 government budget. The government budget is currently being considered by the Cabinet. Finalization and distribution of the budget across the country will begin soon. Therefore, the deteriorating purchasing power situation is likely to improve. It is expected that after the budget is paid out, sales and purchasing power will recover. With rough estimation, the production of 4-wheel cars and 2-wheel motorcycles this year will be the same as last year. Besides, the export market is also affected by geopolitics. The trend is expected to decrease.

The company is trying to enter the market to maintain the production as targeted. It is estimated that the Company's sales in the OEM market this year will be the same as last year in line with the forecast of stable automobile production. For the export market and replacement market, it is expected to improve after the budget is distributed. Therefore, the Company's overall sales are expected to increase by 3 percent.

Meanwhile, the relieved situation of the oil crisis will result in an improvement in the costs related to petroleum. Also, the lighter demand for raw materials will result in a weakening of raw material prices. It is expected that the Company will maintain the profit margins not lower than last year.

However, if there is any impact from changing geopolitics or government policies, such estimation may vary.

2. The company maintains a relatively large amount of money and pays dividends at only 50 percent of net profits. How does the company plan to manage this large amount of cash or to use the money?

It was responded that

Issue 1: The proposed dividend payment at the rate of 50 percent is the level that the Company has been operated continuously for more than 5 years. It seems like a guide for shareholders to know the level of the dividend payment.

Issue 2: Cash management plan;

1. The company has reserved some cash to prevent risks. The automotive industry or automotive products are big products. If there is any affected factor, it may get a fairly strong impact. Therefore, having no debt and having some cash in reserve is appropriate for maintaining the stability of the Company;

2. The Company forecasts that it will be an era of innovation in the future. Therefore, some cash is reserved for innovation investment in new products or new markets that will bring about more sustainability to the Company. Nowadays, the Company is starting to have sales from new products and new markets as well.

As no one put forward any more comment or inquiry, the Chairman thanked all shareholders for participating and declared the Meeting closed.

The meeting closed at 15.00 hours.
